OVERVIEW

The Cisco Meraki MS400 Series brings powerful cloud-managed switching to the aggregation layer. This range of 1 and 10Gbps fiber aggregation switches adopts the benefits of the cloud: simplified management, reduced complexity, network wide visibility and control, and lower cost for campus deployments.

EXPANDING CLOUD MANAGEMENT TO THE CAMPUS

Cisco Meraki aggregation switches extend Meraki’s cloud management to campus deployments. Just like our access switches, these aggregation switches are built from the ground up to be easy to manage without compromising any of the power and flexibility traditionally found in enterprise-class switches.

Meraki switches are managed through an elegant, intuitive cloud interface, rather than a cryptic command line. To bring up a Meraki switch, just plug it in; there’s no need for complicated configuration files — or pre-staging.

INDUSTRY-LEADING CLOUD MANAGEMENT

Cloud management has a number of benefits that make it easier to build campus networks:

- Centralized management that allows you to manage your entire Meraki network stack from campus aggregation to your access layer (wireless APs, switches, firewalls).
- Stack for high density fiber aggregation and manage up to tens of thousands of ports from a single pane of glass.
- Layer 7 OS, client, and hostname fingerprinting.
- E-mail and SMS (text) alerts upon power loss, downtime, or configuration changes.
- Role-based administration and automatic, scheduled firmware upgrades over the web.
- Regular feature updates and enhancements delivered on demand from the Meraki cloud.
- True zero–touch provisioning.
Meraki switches feature high-end hardware features, including:

- Compact, 1RU design for space-constrained environments
- Terabit performance with non-blocking architecture
- Field-replaceable, hot-swappable power supplies
- Field-replaceable, hot-swappable fans
- Front-to-back cooling
- Dedicated management port
- Low power consumption and shallow rack depth, which enable flexible deployment
- Stacking option for building redundant architectures

Full Enterprise Feature Set

Meraki switches include all of the traditional Ethernet features found in the enterprise:

- Quality-of-Service (QoS) to prioritize mission critical traffic such as voice and video
- IEEE 802.1X support for port based network access control
- MAC-based RADIUS auth and MAC whitelisting
- Voice VLAN support for simplified VoIP deployments
- Port Mirroring to monitor network traffic
- DHCP snooping to prevent users from adding unauthorized DHCP servers on the network
- IGMP Snooping to optimize network performance with multicast traffic
- Link Aggregation Control Protocol (LACP) for high-capacity trunking, stacking, and increased availability
- Broadcast storm protection, spanning tree, BPDU guard, root guard, and other safeguards to guard against misconfigurations and reduce convergence time
- Per port VLAN configuration
- Multiple administrative roles with sophisticated security policy management

Designed for a Complete Cloud-Managed Switch Network

Lifetime Warranty with Next-day Advanced Replacement

Cisco Meraki MS switches include a limited lifetime hardware warranty that provides next-day advance hardware switch replacement as long as the original purchaser owns the product. Meraki’s simplified software and support licensing model also combines all software upgrades, centralized systems management and phone support under a single, easy-to-understand model.

</tr>
</tbody>
</table>

## Optional Accessories / Optics

Meraki switches are modular in design, allowing for hot-swappable field replacements and a range of optics (no lock-out of third-party optics). Details of SFP-based modules can be found in the SFP Datasheet, available in the Meraki Library.

Specifications

Management
Managed via the Web with the Meraki cloud management platform
Integrated with Meraki Wireless and complete portfolio of IT products and solutions
Zero-touch remote provisioning (no staging needed)
Virtual Stacking supports thousands of switch ports in a single logical stack for unified management, monitoring, and configuration
Detailed historical per-port and per-client usage statistics
DHCP, client, and hostname fingerprinting
SNMPd and SYSLOG support for integration with other network management solutions
Automatic firmware upgrades with scheduling control

Remote Diagnostics
Email, SMS and Mobile push notification alerts
Email, SMS and Mobile push notification alerts
Cable testing and link failure detection with alerting
Live remote packet capture
Dynamic and interactive network discovery and topology

Stacking
Virtual Stacking supports thousands of switch ports in a single logical stack for unified management, monitoring, and configuration
Physical stacking of up to 8 switches with 160Gbps stack bandwidth (MS410)
Flexible stacking on all interfaces and QSFP+/SFP+/SFP accessory types, up to 8 switches (MS425)

Ethernet Switching Capabilities
802.1p Quality of Service prioritization
802.1Q VLAN tagging for up to 4094 VLANs
802.1D Spanning Tree Protocol (STP) and 802.1w Rapid Spanning Tree Broadcast storm control
802.1ab Link Layer Discovery Protocol (LLDP) and Cisco Discovery Protocol (CDP)
802.3ad Link aggregation with up to 8 ports per aggregate
IGMP snooping for multicast filtering
Cisco Discovery Protocol (CDP)
128K MAC Forwarding Table Capacity (96K on MS410)

Layer 3 capabilities
Static routing
DHCP helper
DHCP server
Open shortest path first (OSPF v2)
Warm spare for L3 gateway redundancy
Automatic DHCP failover in warm spare mode

Mounting
Rack-mountable with included rack mount hardware
Front-to-back airflow

Performance
Non-blocking fabric
480/800Gbps switching capacity on the MS425-16/32
72/144 Gbps switching capacity on MS410-16/32
1.2 microsecond latency
Jumbo frame support (9578 ethernet frame)

Interfaces on MS410
16 or 32 x 1GbE SFP + 2 or 4 x 10GbE SFP+ uplink ports, 2 x 40GbE stacking ports
1x RJ45 Management port

Interfaces on MS425
16 or 32 x 10GbE SFP+/SFP, 2 x 40GbE uplink/stacking ports, supports flexible stacking on all interfaces
1x RJ45 Management port

Power
Power input: 100 - 240 VAC, 47-63 Hz
Power consumption at idle: 50W (MS410), 98W (MS425)
Power consumption full load: 85W (MS410), 136W (MS425)

Environment
Operating temp: 0C to 40C, Humidity: 5 to 95% non-condensing

Physical dimensions
Weight: 12.6lb (5.7kg) MS410-32, 14lb (6.35kg) MS425-32
Size (410): 19” (w) x 20.3” (d) x 1.8” (h) (48.5x 51.6x 4.5cm)
Size (425): 19” (w) x 19.17” (d) x 1.8” (h) (48.5x 48.7x 4.5cm)

Regulatory
CSA (US)
IC (Canada)
CE (Europe)
C-Tick (Australia/New Zealand)
RoHS

MTBF
Model | MTBF
--- | ---
MS410-16 | 583,457 hrs
MS410-32 | 291,729 hrs
MS425-16 | 284,423 hrs
MS425-32 | 287,587 hrs

1 Requires carrier-supported email to SMS gateway
2 OSPF and Warm Spare do not operate concurrently (stacking is recommended for gateway redundancy)
