AGGREGATION SWITCHING WITH MERAKI

The Cisco Meraki 425 series extends cloud management across the aggregation layer for medium-size networks with our 10/40G fiber aggregation switches.

As with our access layer switches, our aggregation switches are built from the ground up to be easy to manage without compromising any of the power and flexibility traditionally found in enterprise-class switches.

To bring up a Meraki switch, simply plug it in. Meraki switches do not require CLI for switch configuration or port management.

Meraki’s centralized management gives administrators granular visibility into their network. Our dashboard helps you keep track of every configuration change in your network with our detailed event and change logs.

INDUSTRY-LEADING CLOUD MANAGEMENT

Cloud management has a number of benefits that make it easier to build campus networks:

- Automatic email alerts from power loss, downtime, excessive Layer 1 errors, or configuration changes
- Powerful remote diagnostic tools such as packet capture to help isolate and troubleshoot network issues
- Firmware upgrades and enhancements from the Meraki cloud
- Virtual Stacking enables switch port configuration changes on the dashboard interface without the need to physically stack switches
- Incredible network transparency with application, operating system, client, and hostname visibility
- Zero-touch provisioning for rapid deployment across sites

Product Highlights

- Use any port to physically stack switches (flexible stacking)
- Aggregation switches to connect multiple access layer devices for a more versatile network
- Available models with 16 or 32 x 10G SFP+ ports to support small- and medium-size enterprises
- 40G uplink interfaces on all models
- Support for field replaceable, redundant power supplies
- Up to 800 G of switching capacity
- 6 configurable QoS queues for converged voice, video, and data applications
- Integrated mounting brackets for rack mounting
- Lifetime hardware warranty and advanced replacement at no additional cost
Meraki switches feature high-end hardware features, including:

- Flexible stacking; use any port of physically stack devices
- Compact, 1RU design for space-constrained environments
- Terabit performance with non-blocking architecture
- Field-replaceable, hot-swappable power supplies/fans
- Front-to-back cooling
- Dedicated management port
- Low power consumption and shallow rack depth, which enable flexible deployment
- Stacking option for building redundant architectures

Enterprise-Ready Features:

Meraki switches include all of the traditional Ethernet features found in the enterprise:

- IEEE 802.1X, MAB, and Hybrid authentication support for wired access control with RADIUS server monitoring
- ACL support (IPv4 & IPv6) and MAC whitelisting
- Single-Host/Multi-Domain/Multi-Host/Multi Authentication
- Change of Authorization (CoA) and RADIUS accounting support
- DHCP snooping to protect against rogue DHCP servers on the network
- Dynamic ARP Inspection to prevent man-in-the-middle attacks
- Rapid Spanning Tree, BPDU guard, root guard, loop guard, and other safeguards to help prevent misconfigurations and reduce convergence time
- Per port VLAN configuration, Voice VLAN support for simplified VoIP deployments
- Port Mirroring to monitor network traffic
- IGMP Snooping to optimize network performance for multicast applications
- Multiple administrative roles with sophisticated security policy management
- Link Aggregation Control Protocol (LACP) for high-capacity trunking, with Multichassis (MLAG) support on stacked switches
- Quality-of-Service (QoS) to prioritize mission-critical traffic such as voice and video
- CDP, LLDP advertisement and snooping, with detailed neighbor visibility and discovery

Designed for a Complete Cloud-Managed Switch Network

Lifetime Warranty with Next-day Advanced Replacement

Cisco Meraki MS switches include a limited lifetime hardware warranty that provides next-day advance hardware switch replacement as long as the original purchaser owns the product. Meraki’s simplified software and support licensing model also combines all software upgrades, centralized systems management and phone support under a single, easy-to-understand model.

Optional Accessories / Optics

Meraki switches are modular in design, allowing for hot-swappable field replacements and a range of optics (no lock-out of third-party optics). Details of SFP-based modules can be found in the SFP Datasheet, available in the Meraki Library.

* Single power supply (PSU) included. For redundancy, second PSU is sold separately
Specifications

Management
Managed via the Web with the Meraki cloud management platform
Integrated with Meraki Wireless and complete portfolio of IT products and solutions
Zero-touch remote provisioning (no staging needed)
Detailed historical per-port and per-client usage statistics
Operating system, device, and hostname fingerprinting
SNMP and SYSLOG support for integration with other network management solutions
Automatic firmware upgrades with scheduling control

Remote Diagnostics
Email, SMS and Mobile push notification alerts ¹
Ping, traceroute, cable testing, and link failure detection with alerting
Remote packet capture
Dynamic and interactive network discovery and topology
Combined event and configuration change logs with instant search

Stacking
Virtual Stacking supports thousands of switch ports in a single logical stack for unified management, monitoring, and configuration
Physically stack of up to 8 switches with 80 Gbps of stacking bandwidth
Flexible stacking on all interfaces and SFP+/QSFP+ accessory types, up to 8 switches

Ethernet Switching Capabilities
802.1p Quality of Service, 8 queues (w/ 6 configurable for DSCP-to-CoS mapping)
802.1Q VLAN and trunking support for up to 4,094 VLANs
802.1w, 802.1D Rapid Spanning Tree Protocol (RSTP, STP)
STP Enhancements: BPDU guard, Root guard, Loop guard, UDLD
Broadcast storm control
802.1ab Link Layer Discovery Protocol (LLDP) and Cisco Discovery Protocol (CDP)
802.3ad Link aggregation with up to 8 ports per aggregate, Multichassis aggregates supported on stacked switches
Port mirroring
IGMP snooping for multicast filtering
MAC Forwarding Entries: 228K

Layer 3 capabilities
Static routing, OSPFv2
Multicast routing
Warm Spare (VRRP) ²
DHCP Relay, DHCP Server

Mounting
Rack-mountable with included rack mount hardware
Front-to-back airflow

Performance
Non-blocking fabric
480/800Gbps switching capacity on the MS425-16/32
1.2 microsecond latency
Jumbo frame support (9578 ethernet frame)

Interfaces
16 or 32 x 10G SFP+
2 x 40G QSFP+
1x RJ45 Management port

Power
Power input: 100 - 240 VAC, 47-63 Hz
Power consumption: 98-136W

Environment
Operating temp: 0°C to 40°C, Humidity: 5 to 95% non-condensing

Regulatory
CSA (US)
IC (Canada)
CE (Europe)
C-Tick (Australia/New Zealand)
RoHS

Warranty
Full lifetime hardware warranty with next-day advanced replacement included

MTBF
Model | MTBF
MS425-16 | 284,423 hrs
MS425-32 | 287,587 hrs

¹ Requires carrier-supported email to SMS gateway
² OSPF and Warm Spare do not operate concurrently (stacking is recommended for gateway redundancy)
