

# Helping healthcare connect in difficult times

Fast, dependable networking support when you need it most.

Cisco Meraki enables healthcare facilities struggling with rapid COVID-19 response to **securely** bring field hospitals, testing areas, and telemedicine venues online **in minutes** — whether it's one site or thousands. The **speed** of deployment, along with **simplicity** and **ease-of-use**, ensure no time is wasted even amidst chaotic, changing environments.

## Critical scenarios where Meraki can help

Remote sites — such as **field hospitals** or **telemedicine** deployments — can be rapidly provisioned and securely brought online. Staff exposure can be reduced and protective equipment conserved through **visual patient monitoring**. For comprehensive security, site-to-site VPN, Wi-Fi, cellular, and Smart Camera capabilities, our Security & SD-WAN Appliances, MR Wireless Access Points, MG Cellular Gateways, and MV Smart Cameras can be deployed in various combinations. All Meraki equipment provides:

- Enterprise-grade security
- Zero-touch provisioning out-of-the-box, so gear can be pre-configured before arrival
- Built-in remote diagnostics and live troubleshooting tools, for rapid root cause analysis and issue resolution from afar
- Intuitive, central management across all networks, clients, and equipment via an internet-accessible dashboard
- Proactive monitoring of new WAN links and critical applications to ensure quality of service

In addition, the Cisco Meraki cloud-managed dashboard supports APIs for automating and streamlining the secure, rapid deployment and maintenance of remote sites.

Thank you healthcare providers.

## Suggested products by use case

Remote field hospitals & testing sites	Telemedicine	Remote patient monitoring
<p>Highly-available, secure remote networks that can be deployed in minutes at outdoor/indoor field sites.</p> <p><b>Wi-Fi + security + cellular failover + site-to-site VPN + proactive app/WAN monitoring</b></p> <p>Up to 50 clients: <i>MX68CW, MX68W, MX67W, MX64W</i>            Over 50 clients: <i>MX84, MX100</i>            Add Meraki Insight for WAN/app health</p> <p><b>Primary/failover cellular connectivity</b></p> <p>Outdoor/Indoor + IP67-rated: <i>MG21, MG21E</i></p> <p><b>Wi-Fi</b></p> <p>Outdoor &amp; larger parking lots: <i>MR74, MR84</i>            Small indoor: <i>MR33, MR36 (Wi-Fi 6), MR42</i>            Indoor, external antenna for high ceilings, targeted Wi-Fi: <i>MR53E</i></p> <p><b>Smart cameras</b></p> <p>Outdoor: <i>MV72</i></p>	<p>Secure access to main campus resources, easy installation, and integrated Wi-Fi for telemedics.</p> <p><b>Wi-Fi + security + cellular + VPN + proactive app/WAN monitoring + PoE for VoIP telephony, printers, etc.</b></p> <p>Up to 5 clients: <i>Z3C, Z3</i>            Add Meraki Insight for WAN/app health</p> <p><b>Wireless access points for teleworker VPN</b></p> <ul style="list-style-type: none"> <li>• Entry level: <i>MR33</i></li> <li>• Future-proof: <i>MR36</i></li> <li>• General purpose: <i>MR42</i></li> </ul>	<p>Continuously monitor up to 16 patients on one video wall to help keep staff safe and preserve PPE.</p> <p><b>Smart cameras</b></p> <ul style="list-style-type: none"> <li>• Full visibility of patient room (15ft<sup>2</sup>): <i>MV12W</i></li> <li>• Hallways, narrow rooms: <i>MV12N</i></li> <li>• Detailed, zoomed viewing: <i>MV22, MV72</i></li> <li>• Increased retention, quality: <i>MV22X, 72X</i></li> </ul>

## Special offers

- 90-day free trial of up to 20 pieces of Meraki equipment for all healthcare customers. [merakiresources.cisco.com/m-healthcare-trial](https://merakiresources.cisco.com/m-healthcare-trial)
- Next-day delivery of in-stock gear for USA customers.
- 100% discount on 1-year license with any HW purchase above \$10K USD for all temporary field hospital or pop-up clinic deployments
- Cisco Capital **2020 Business Resiliency Program** for financial assistance

**10+ years**  
scaling cloud infrastructure

**500,000+**  
customers served globally
