

Helping healthcare connect

Fast, dependable networking support when you need it most.

Cisco Meraki enables healthcare facilities to quickly and securely connect field hospitals, testing areas, and telemedicine venues, and provides scalability to extend that connectivity to thousands of sites.

Through simplicity and ease of management, IT teams become more efficient and can accelerate response programs at scale.

“

Meraki products enable us to have the flexibility to remotely manage and troubleshoot connectivity and security issues and allow us to support our work around the world.

JOSH OVERBY

Assistant Director of IT Global Support Services at Samaritan's Purse

All Meraki equipment provides:

Enterprise-grade security

Zero-touch provisioning out-of-the-box

Built-in remote diagnostics & live troubleshooting tools

Intuitive, central dashboard for all networks, clients, & equipment

Proactive monitoring of new WAN links & critical applications

Customisable platform with built-in integrations and an application marketplace

Suggested products by use case

New sites	Telemedicine	Remote patient monitoring
