

AT A GLANCE

Meraki MV84X

OUTDOOR

IP66 | IK10+

4-IMAGERS

Designed for effortless and comprehensive coverage, the MV84X is a powerful multi-imager device featuring four cameras in a single housing. Delivering exceptional image quality, MV84X ensures complete security coverage while simplifying installation, reducing cabling, and surfacing business insights, all while delivering exceptional image quality.

A multi-imager varifocal camera for ultimate coverage

Eliminate blind spots

Secure your premises by aiming each imager in a different direction and adjusting optical zoom to monitor different areas or intersections all with one camera

Deliver visual detail

Designed for clear monitoring of people and vehicles with four 5 MP (20 MP) high-resolution varifocal imagers with optical zoom

Sustained security in all conditions

Protective camera enclosure, supporting continuous monitoring in low-light conditions through night vision and 360-degree infrared illumination

Access from anywhere

Cloud-based video allows for remote management and monitoring of your space

Accelerate incident resolution

Locate critical video sooner via AI-enabled search tools like people and vehicle detection

Single dashboard management

Seamlessly integrate cameras to your network through the Meraki dashboard for unified management of physical and networking solutions
