CISCO Meraki
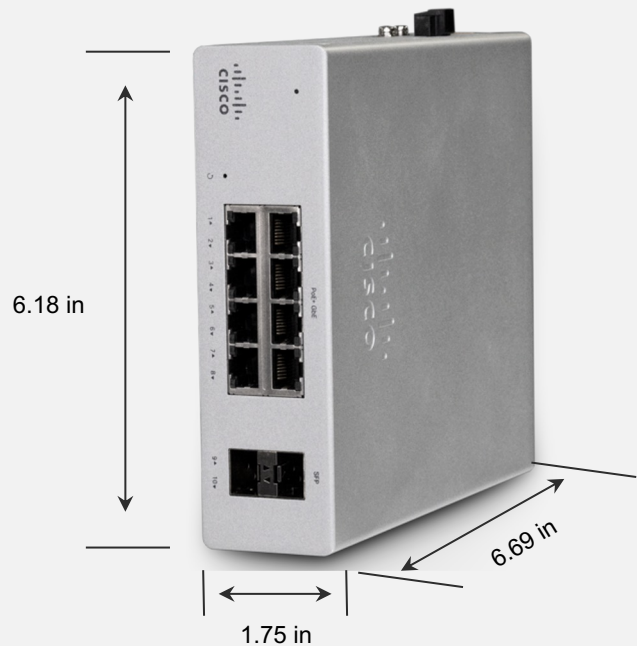

Extend the Network to Ruggedized Spaces With MS130R

Perfect for connecting outdoor access points, cameras, and other IoT devices in hot/cold/tight environments.

6.18 in

6.69 in

1.75 in

Designs for adapting to non-traditional environments

Extend connectivity to harsher spaces

Power more use cases with **IP30** protection and support from **-40 °C** to **70 °C**.

Flexible mounting and power options

Mount via DIN rail, rack, or wall mount with multiple external power supply options.

Smart power management with PoE

Lower cabling cost and faster deployment with up to 30 W per port.

Manage it all from miles away

Streamline network management from configuration, troubleshooting, firmware updates, and remediation.

Security without headache

Provide an additional layer of security based on the intent of the user, device, and application.[1]

One dashboard, any environment

Bring the powerful Meraki cloud-native platform to challenging environments without the extra learning curve.

1. Future release: MS130R is hardware-ready for the Adaptive Policy feature with a <u>future</u> firmware upgrade and advanced license.
